

Introducing SKF SEAL JET DD service

Now, if we don't have the seals you need on our shelves, we can make many of them with our new SKF SEAL JET DD system. This new CNC controlled machining system enables us to custom machine seals up to a diameter of 200 mm in a wide range of profiles and polymeric materials to meet your application's needs. Plus, any seals we don't have or can't make, we can get them directly from SKF.

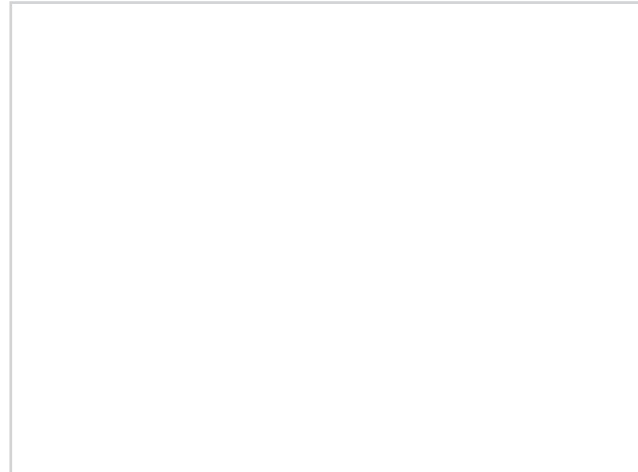

Benefits include:

- Standard seals in non-standard dimensions
- Increased availability and reduced delivery time
- No need to maintain in-house stock
- Local, single-source access to a comprehensive sealing solutions portfolio
